

# Nora Research

Professional device for bio-resonance therapy  
(Rife/Clark frequency generator)

# Heiron

# Bio-resonance therapy - alternative

## Purpose:

Professional electronic apparatus "Heiron" is a new generation device and is designed for active bio-resonance therapy (ABT) on the human body based on the generation of electromagnetic signals of certain frequencies and waveforms, through which the influence of harmful pathogens (bacteria and viruses) and parasites in the human body and clearing it of toxins. Treatment without medication for a very wide range of diseases.

The device is specifically designed to meet all requirements professional contact bioresonance therapy according to the writings of scientists, Dr. Hulda Clark and Dr. Raymond Rife, and for convenience is attached "Frequency reference guide book" - therapeutic frequencies Rife / Clark. Attached is an additional computer CD-ROM drive with the entire database of frequencies CAFL for over 1,300 diseases. Frequency range is from 0 to 10 000 000 Hz (0-10 MHz) in increments of 1Hz and 0.1Hz accuracy. There are two interchangeable modes according to the type of therapy: a rectangular output signal (for the Clark therapy) and sinusoidal output signal (Rife

therapy). The output power is smoothly adjustable and can be precisely adapted to the sensitivity of each organism and the disease (0-22V). Setting the switching frequencies and modes as easily and are made by pressing quasi-sensor buttons. The output frequency is displayed on the precision illuminated LCD display, which facilitates control in. Available indicator light sensitivity (output control), which can be monitored 100% contact with the body. Built are sound and light control indicators. There are 4 current protection, which ensures complete safety in use. Both types of electrodes (bracelets and handles) kit provides flexibility therapy. We use the most modern technology combined with unique microprocessor program allows the device to have high technical parameters combined with maximum easier use. These properties allow it to be applied by all medical professionals and therapists in their practice, but also for private everyday use. Belongs to a professional grade appliances. Designed and manufactured entirely in the European Union. Available detailed instructions in the English language. There is warranty and post warranty maintenance. More information available on our website:

## Technical characteristics:

- Spectrum:
  - Mode "Rife": sinusoidal output signal (THD: <0.01%)
  - Mode "Clark": rectangular output signal with duty cycle 50%
- Frequency range:
  - Mode "Rife": 0-9999999 Hz (sine wave)
  - Mode "Clark": 0-7000000 Hz (rectangle)
- Accuracy of the generated frequencies: <0.1Hz
- Resolution of frequency: 1Hz
- Visualization of frequency: STN LED LCD display
- Output Offset: 100% positive
- Output: smoothly adjustable 0 - 22V + / - 10% (5-4000000 Hz)
- Accuracy of marking on the output regulator: <20% (5-4000000 Hz)
- Maximum output current: 0.01A
- Protections: 3 built-in current protections + external removable fuse.
- Power supply unit: a network 220/230V / 50Hz (+ / - 15%)
- Power consumption: max.10W
- Temperature range for normal operation: from +10 to +35 degrees Celsius
- Operation in humidity: <70%
- Weight: not more than 3 kg.

## Features

Modern design, comfortable control and display

Reliable and comfortable electrodes

Rich accessories, detailed documentation
