Electronic device to obtain a silver water
(colloidal silver generator)

Ponor

Silver ions - a source of health and life

Purpose:

Electronic device for silver ionization water "Ponor" is a new generation of equipment designed for the enrichment (dressing) of water (spring, tap, etc.) silver ions (Ag), thereby producing silvery water (colloidal silver). With his help can be continuously enriched random amounts of water. It is possible to obtain water at different concentrations, as well as for everyday use, preserving food and beverages and for higher concentrations of silver treatment and prolonged storage of water. The effect of silver ions is on more than 650 types of bacteria (as opposed to: the effects of any antibiotic is over no more than 5 to 10 types of bacteria). It is known that the antimicrobial effect of silver is higher than that of penicillin. Meanwhile, silver ions spare cells beneficial bacteria, absent adverse effects on the body

- something typical of antibiotics. Healing properties of colloidal silver are known from ancient times. Silver water can be used for everyday use for cosmetic and medicinal uses.

Device "Ponor" is characterized by its comfort, quality and long life, which makes it suitable for use in everyday life, medical and cosmetic centers. Silver electrode is made most pure silver and is intended for multi use. The use of the device is not bound by the use of a particular vessel. Modern microelectronics is used as the apparatus is designed and manufactured entirely in the European Union. Available is a detailed instruction manual in English. There is a guarantee and warranty support. For more information:

www.noraresearch.com

Technical characteristics:

Power: 220V/50Hz AC +/- 10% (optional 110V)

Power consumption: <0.5W

Amplitude of the output: 12V

Concentration of silver ions in accordance with the volume: 0.3 - 0.4 mg / l

Output current: reverse - 0.3Hz

Electrode resource: > 20 000 l (Resource of the electrode is approximate and applies only to wear the silver part, mechanical damage may occur much earlier);

Volume of ionized water: 1, 2 or 3 liters

Silver electrode: pure silver .999

Warranty: 12 months

Features

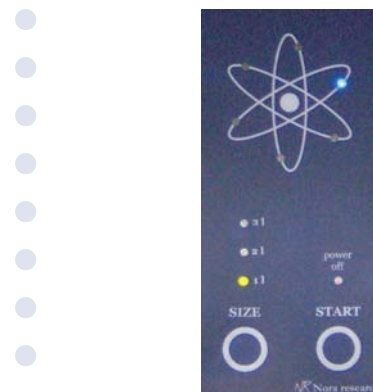

applicable to all vessels

electrode of pure silver with a long life

suitable indicators and buttons
