Professional quantum therapy device

Hera

Quanta - the energy in the universe

Purpose:

Professional electronic therapeutic device "Hera" is a new generation instrument is designed to perform quantum therapy on the human organism. Quantum Therapy is a modern trend in modern medicine. Used in more than 9500 hospitals in Russia, Europe and USA. Has been shown to decrease the sick patients from 3 to 6 times in Quantum treatment therapy. Impact on biologically active zones and bodies in the human body via electromagnetic radiation within a certain range. Thereby stimulating its own vitality to fight many diseases, improves circulation, activates the body's immune system and has anti-inflammatory and analgesic action. With his help to carry out without drug and painless treatment for a wide range of diseases. Upon acceptance of medication therapy apparatus fold increase in their effectiveness. Unlike medicines, apparatus "Hera" not just treat the disease, but weakened and transformed cancer cells of the organism in sound health, thereby

achieving a strong effect of treatment for a short period of time. Thanks to new technologies and the element base has been possible to have a handset offering therapy, which until recently offered only clinics. There are 4 programs to therapy, and 3 automatic interval duration of therapy. Placing the device and work are most facilitated and carried out by pressing buttons. In combination with modern design provided sound and light indicators. Device is characterized by its comfort, quality and long life, which makes it suitable for use in everyday life, medical and therapeutic centers. Therapeutic head is compact and flexible cable which facilitates work with it. Power is carried through safe transformer adapter. Modern microelectronics is used as the apparatus is designed and manufactured entirely in the European Union. Available is a detailed instruction manual in English. There is a guarantee and warranty support. More information can be found on our website: www.noraresearch.com

Technical characteristics:

Types of radiation:

- Pulse infrared laser spectrum close
- Pulse broad infrared radiation
- Pulsating radiation in the red (visible) spectrum
- Permanently radiation in red (visible) range

Length of rays:

- Laser radiation: 800 to 910 nm
- Infrared radiation: 860 to 960 nm
- Red radiation: 500 to 700 nm

Pulse power of laser infrared radiation: max. 8W

Intensity of radiation in the red spectrum: max. 27,000 mcd

Power transmission in the red spectrum: max. 1W

Time the session: automatic - 5, 10 or 20 min + / - 10%

Power of the device: through transformer power adapter from the network 220/230V / 50Hz (optional 110V)

Power Consumption: max.10W

Mass: no more than 2 kg.

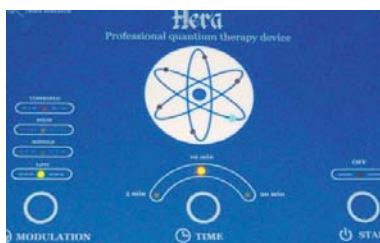

Warranty: 12 months

Features

convenient therapeutic head

4 programs, 3 time intervals, suitable indicators and buttons

modern and comfortable design
